Workstream 1

Demand for Health Care

Understanding changes in the demand for health and social care (H&SC) from different population groups and the implications for how health and care services are provided and funded.

Workstream 2

Supply side efficiency

Measuring what is being delivered for the money spent on H&SC to maximise quality of care and improvements in health and wellbeing.

Workstream 3

Organisation, incentives & regulation

Designing the organisation of health and care systems to make the best use of resources to deliver joined-up care for the population.
